PROFESSIONAL SUMMARY

Data Scientist with hands-on experience building end-to-end ML pipelines using **Python**, **Scikit-learn**, and **Deep learning** frameworks. Delivered several production-deployed projects spanning **NLP**, **computer vision**, and predictive modeling, from **data preprocessing** to live deployment on **Flask**, **Streamlit**, **Render** and **Railway**.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS

ML / DL: Scikit-learn, TensorFlow, Keras, FaceNet, MTCNN, NLTK, CountVectorizer, Cosine Similarity, CV2

Data Analysis: Pandas, NumPy, EDA, Data Wrangling, Feature Engineering, Statistical Analysis

Visualization: Matplotlib, Seaborn, Power BI

Cloud / Deployment: Flask, Streamlit, Railway (CI/CD)

Databases: MySQL, PostgreSQL, SQLAlchemy ORM

Tools: Jupyter Notebook, VS Code, Google Colab, Git & GitHub, MySQL Workbench

PROJECTS

Face Recognition Attendance System (Training Basket Internship) *FaceNet | MTCNN | Flask | CV2 | MySQL*

- Developed robust real-time attendance system using **FaceNet** and **MTCNN** for automated tracking.
- Achieved 80%+ **face-matching accuracy** sub-second face matching using in-memory **NumPy embeddings**.
- Combined **Flask** and reporting into one flexible **computer vision pipeline**.

MovieFlix — Movie Recommendation System *Python | NLP | Scikit-learn | Streamlit | TMDb API 2025*

- Engineered intelligent **content-based recommender** for 5000 movies using **NLTK** and **cosine similarity**.
- Generated rapid sub-2-second recommendations using **CountVectorizer** with 5,000 **engineered features**
- Resolved critical **API fallbacks** and deprecated parameters, boosting Streamlit app reliability
- Handled a bulky 176MB model file via **GitHub LFS** for consistent deployment.

Loan Approval Predictor *Python | Scikit-learn | Flask | HTML | CSS*

- Designed a precise **Bagging Classifier** predicting loan approval with strong **accuracy of 80%+**.
- Streamlined repetitive **data cleaning**, **encoding**, and **scaling**, simplifying the **ML preprocessing workflow**.
- Deployed interactive **Flask app** for real-time, reliable loan eligibility predictions.

NexVault — Cloud-Deployed Banking System *Python · Flask · MySQL · SQLAlchemy · Railway*

- Launched a working banking app on **Railway** with continuous integration and deployment
- Secured sensitive transactions using **SHA-256 PIN hashing** and **brute-force** lockout protection.
- Architected modular OOP system with **SQLAlchemy ORM** ensuring strict transaction integrity.

INTERNSHIP

Internship (Data Science Intern, Training Basket) *(Dec 2025 – Present)*

Crafted an end-to-end Face Recognition Attendance System using **FaceNet**, **MTCNN**, **Flask**, **OpenCV**, and **NumPy**, accelerating face matching through **RAM-based embedding** storage to achieve sub-second identity recognition without database lookups. **Eliminated proxy punching** and manual errors by introducing accurate, **real-time facial recognition** for attendance tracking.

EDUCATION

Bachelor of Computer Applications (BCA) *2022 – 2025*

Gagan College of Management and Technology, Aligarh, Uttar Pradesh
